

light rain

design by Claudine Gévry

Drawing our inspiration from a classic rainy day in Vancouver, we decided to bring back timeless incandescent light bulbs suspended upside-down by tiny stainless steel cables. We also suspend energy efficient retro looking LEDs using ultra-thin proprietary electric cables. The light from the LEDs bounces off the glass in the incandescent bulbs. These illuminated raindrops are sure to brighten your space with their sheer elegance and simplicity. We're glad to be able to give these industrial era light bulbs a second life, instead of seeing them end up in landfills.

Just like regular drops of rain, our light rain collection is also available in several shapes and sizes, and can be customized to perfectly fit your needs.

light rain

design by Claudine Gévry

vertical light rain

pendants	20 to 100
materials	aluminium, upcycled light bulbs
weight	approximately 3,3lb (1.5kg) per 30 light bulbs
lamping	depending on size; variable number of LEDs (270 lumens each)
voltage	12v for ceiling outlet box installation: we recommend 40W Kichler LED driver/ transformer + dimmer (sold separately) without ceiling outlet box: small white plug-in wall transformer (110-220v to 12v) and round low voltage power cable to mobile
dimming	yes for ceiling outlet box installation: we recommend 40W Kichler LED driver/ transformer + dimmer (sold separately) without ceiling outlet box: portable remote control dimmer
custom options	curved hand hammered canopy
price	starting at \$1190
notes	replacement lights available upon request two different installation options: with or without ceiling outlet

light rain

design by Claudine Gévry

horizontal light rain

pendants	30 to 200
materials	aluminium, upcycled light bulbs
weight	approximately 3,5lb (1.6kg) per 30 light bulbs
lamping	depending on size; variable number of LEDs (270 lumens each)
voltage	12v for ceiling outlet box installation: we recommend 40W Kichler LED driver/transformer + dimmer (sold separately) without ceiling outlet box: small white plug-in wall transformer (110-220v to 12v) and round low voltage power cable to mobile
dimming	yes for ceiling outlet box installation: we recommend 40W Kichler LED driver/transformer + dimmer (sold separately) without ceiling outlet box: portable remote control dimmer
custom options	curved hand hammered canopy
price	starting at \$1390
notes	replacement lights available upon request two different installation options: with or without ceiling outlet
